

Memo for Record: Engineering and Facilities Meeting

June 3 2019

We had an off-site meeting of the Lake Saint Louis E and F Committee on June 3, 2019. Most of us met at the Duello road sight. It was a way to review what has been done so far to alleviate the water runoff problems. We walked the grounds and discussed the ongoing issues dealing with the water runoff problems.

The contractors will keep working the issues related to grading the land and dealing with water runoff issues. It is to rain this week and we will watch what happens.
